Prepared 7 November 2026 | Current settings and proposed changes are distinguished.

SECTION 01 / 08

Main website font

The current website declares **Inter** as its primary typeface, followed by platform and generic sans-serif fallbacks. The default body size is **15 px** with a **1.6 line height** (24 px at the default size).

Setting	Current value	Explanation
Primary font	Inter	Declared first in the CSS font stack
Fallbacks	ui-sans-serif, -apple-system, BlinkMacSystemFont, Segoe UI, sans-serif	Browser uses the first available font
Desktop body	15 px / 1.6	24 px computed line height
Mobile body	14 px / 1.6	22.4 px computed line height, at 680 px or below
Form controls	font: inherit	Buttons, inputs, selects and text areas inherit typography

Font availability: Inter is named in the stylesheet but is not loaded or bundled by the provided ZIP. Visitors without Inter installed see a system fallback. The PDF itself uses an embedded readable sans-serif for reliable viewing.

SECTION 02 / 08

Heading font sizes

Heading / selector	Desktop CSS size	Weight / spacing
Global H1	34.4-54.4 px (clamp)	820; 1.2 line height; -0.045em tracking
Homepage hero H1	32-62.4 px (clamp)	820; 1.07 line height
Inner page H1	32-48 px (clamp)	820; 1.2 line height
Service hero H1	32-51.2 px (clamp)	820; 1.2 line height
Global H2	22.4-32 px (clamp)	780; 1.2 line height; -0.045em tracking
Global H3	17.92 px (1.12rem)	760; 1.2 line height; -0.025em tracking

Interpretation: The ranges shown for clamp() are the lower and upper limits. The actual rendered size varies with viewport width.

SECTION 03 / 08

Header, logo & navigation

The interface uses a strong logo, compact navigation labels and orange call-to-action buttons. The desktop sidebar is 252 px wide; its top bar has a minimum height of 76 px.

Element	Size	Weight / notes
Siisti360 wordmark	27 px	900
Sidebar navigation link	13 px	600
Section label	10 px	750
Breadcrumb	12 px	Regular
Language switcher	12 px	750
Location label	11 px	Regular
Primary / secondary buttons	13 px	750; minimum height 45 px
Uppercase eyebrow	10 px	850; letter spacing 1.55 px
Sidebar callout title	16 px	Bold
Sidebar supporting text	12 px	Regular
Sidebar footer	11 px	Regular

SECTION 04 / 08

Typography across website sections

The following sizes are used on the homepage, service listings, location pages, FAQs, articles, contact forms and footer.

Section	Element	Current size
Homepage	Hero description / trust labels	14 px / 11 px
Statistics	Title / supporting line	14 px / 11 px
Service cards	Heading / description / tag	15 px / 11 px / 10 px
Location cards	Heading / supporting text	16 px / 11 px
How it works	Step number / title / description	29 px / 16 px / 12 px
Why choose us	Trust paragraph / checklist	13 px / 13 px
FAQs	Question / answer	12 px / 12 px
Contact & quotes	Field label / intro	12 px / 13 px
Service detail	Intro / paragraph / scope details	15 px / 13 px / 11 px
Guides & articles	Article H2 / article text	21 px / 13 px
Legal pages	Paragraph	14 px; line height 1.9
Footer	Brand / section title / links	22 px / 12 px / 11 px

Readability observation: Several descriptive texts are 11-12 px, especially in cards and footers. These are candidates for improvement in Section 08.

SECTION 05 / 08

Pricing, calculator, booking & testimonials

These are the typography rules for the enhanced conversion features in the latest website ZIP.

Feature	Text element	Current size / weight
Pricing model	Card title	19 px; inherited H3 weight
Pricing model	Price figure	25 px; 820
Pricing model	Description / ID	13 px / 11 px (ID 750)
Price comparison	Header / table values	12 px / 13 px
Estimate calculator	Main estimate	29 px; bold/inherited
Estimate calculator	Supporting text	12 px
Previous calculator	Previous estimate style	40 px; bold
Why choose us	Benefit title / description	18 px / 13 px
Our story	Main section heading	24-34 px; clamp
Online booking	Section heading	21 px
Online booking	Step indicator	13 px; 700
Booking fields	Label	13 px; 720
Booking fields	Input text	Inherited 13 px
Booking	Notes / status	13 px
Testimonials	Review text / stars	14 px / 19 px
Admin dashboard	H1 / statistics / table	35 px / 28 px / 12 px

Pricing-display distinction: These values describe type size only, not actual service prices or verified competitor prices.

SECTION 06 / 08

Responsive font sizes & breakpoints

The design adjusts typography and layout across desktop, tablet and mobile widths. CSS breakpoints are based on viewport width, not device type.

Element	Desktop	Mobile (680 px or less)
Body text	15 px	14 px
Hero H1	Up to 62.4 px	33.6-48 px
Section H2	22.4-32 px	22 px for section headings
Service card heading	15 px	13 px
Service descriptions	11 px	11 px
Navigation links	13 px	13 px in mobile menu
Buttons	13 px	13 px (mobile CTA 14 px)
Pricing amount	25 px	21 px at 700 px or below
Booking step	13 px	11 px at 700 px or below

Breakpoint	Layout / typography change
1400 px	Service grid reduces to three columns
1170 px	Sidebar logo 24 px; sidebar width 218 px
900 px	Icon-only sidebar 74 px; hero H1 33.6-48 px
700 px	Booking steps 11 px; pricing amounts 21 px
680 px	Body 14 px; mobile navigation drawer; fixed booking CTA
420 px	Pricing cards become one column
385 px	Service cards one column; breadcrumb text 10 px

SECTION 07 / 08

Current brand color palette

These CSS variables are shared across the multilingual site. They define the visual hierarchy alongside the typography.

Primary navy	Sidebar, headings and dark surfaces	#10263D
Secondary navy	Supporting dark backgrounds	#183C56
Text ink	Main website text	#142C42
Muted text	Secondary descriptions and labels	#677C8D
Primary orange	Primary buttons and booking calls to action	#FF8D43
Dark orange	Orange emphasis and hover states	#E97123
Primary teal	Links, active states and highlights	#0D9D8C
Dark teal	Deeper teal interaction states	#087F72
Background	Soft page background	#F5F8FA
Divider line	Borders, separators and tables	#E2E9EE

Tip: The navy/orange/teal combination creates a clear visual system: navy for hierarchy, orange for primary actions, and teal for interactive and trust cues.

SECTION 08 / 08

Recommended typography improvements

The table compares the current website with a more readable consumer-facing design. **These recommendations have not been applied to the ZIP.**

Element	Current	Recommended
Standard body paragraph	15 px desktop / 14 px mobile	16 px desktop / 15-16 px mobile
Navigation links	13 px	14-15 px
Service-card description	11 px	14-15 px
Contact / booking labels	12-13 px	14 px
Primary buttons	13 px	14-16 px
FAQ text	12 px	15-16 px
Footer links	11 px	13-14 px
Article text	13 px	15-16 px

Implementation priorities

01 **Load Inter consistently**
The current CSS names Inter but does not import or bundle it. Use an approved hosted stylesheet or properly licensed, self-hosted assets.

02 **Increase small explanatory copy**
Prioritize service cards, FAQs, descriptions and footer links because readers rely on this information before requesting a quote.

03 **Keep clear interaction targets**
Maintain visible focus states and comfortable click/tap areas around 44 px or larger in height.

04 **Re-check all locales**
Test the revised type scale in Finnish, Swedish and English; translations can change line lengths and wrapping.

05 **Regenerate the static pages**
Update shared CSS and templates, then rebuild and re-test all 333 pages so desktop and offline copies stay consistent.

Document status: Sections 01-07 describe the latest inspected Siisti360 website CSS. Section 08 contains proposed changes only; it does not assert that the website was updated.
